

Wayne's Note:

Spring has officially sprung and with that comes the awakening of dormant life all over this world, including me by the way.

It is not that we stagnate over the long Canadian winters but not having to place on many layers of clothes come spring time, is an obvious advantage to getting out and about. The air smells different, the energy from the sun is getting stronger and everything is literally coming alive.

This leads me to this month's theme, ***"What makes you feel Alive?"*** How much more appropriate can this theme be for the spring edition at The Magic Happens. Yes, I hear you thinking to yourself about the general state of the world today. I have always tried to follow one of the rules of the universe that states, "You get what you focus on". It is not that I push the state of the world affairs aside but rather I love to read about all the individual optimism there is, given the current situation.

Yes, I can focus on how the banks are closing, about people are losing their jobs and so on. But WHY would I do that? It would become a real energy vampire that I do not want to go to. I am a resident of this planet and I will be damned if something of this nature happening is going to stop me from being what I desire to be. **ALIVE!**

Over the past six or so months I have been seeing an abundance of feel good stories out there in mainstream Planet Earth mass media. I applaud each and every one of these stories I read coming from people like you and me. These stories are showing all the attributes that we have always had inside of us. Our caring, our love, our survival instincts and the list continues.

People are becoming more AWAKE

to use the term very loosely. Many of you are just thinking about things in different terms these days and it is spawning a new type of energy that is being felt every where.

Many of you readers here are not contributors to this magazine as writers. Even though you are not, I challenge you take a few minutes out of your day and think about, what makes you feel alive.

I will tell you this upfront, you will really surprise yourself and maybe even get a few AHA moments, after taking up this challenge. Always remember to just have fun at whatever you are doing in your little space of this world. The energy you put out will come back to you ten fold.

Stay tuned for the Summer Edition of The Magic Happens. Can you believe it??? It will be two full years of world wide exposure. Can you tell that I am already thinking ahead to the next edition???

Please enjoy being alive along with reading the amazing articles that follow in this edition.

Till next edition.....

Peace and Love

Wayne
