

The Magic Happens – An Introduction.

The Magic Happens is the banner under which we (Wayne and Kat) have built our lives since we met. We have discovered that having that as our intention has really caused the Magic to Happen.

When we decided we wanted to create a magazine, it only made sense that the magazine would be about how the Magic really does Happen in our life and the lives of many of our friends. The natural progression from there was to use our banner as the title of our magazine also.

This first issue is a little different in a few ways than we intend for the following issues to be. We thought the first issue should be more about context than anything else. A little bit of far history and 9 months worth of recent history so you can kind of get a sense of who we are. Since we had so many topics to cover for this issue, we have left off most of our personal commentary about how things felt, what we learned and what we might do differently next time.

This is a very new experience for us... just an experiment really. We found as we wrote article after article that our language got a bit richer and expressing our views got a little easier. Though this issue is offered to you in chronological order, it wasn't written that way so it might be difficult for you to follow the progression.

Our intention is to create something powerful here and we had to start some where. We have plans for much more and more expanded topics for the next issue and yet, we don't know what it will look like yet exactly. The 3rd issue will likely go through another transformation, as we are learning as we go and this magazine will need to evolve as we learn.

It was important to us that this magazine stays flexible so it can always evolve towards something more and better as we evolve and as our connection with others multiply.

We would appreciate and welcome any feed back you care to offer. We want this to serve our readers at least as much as ourselves and we won't know what is serving until we begin to hear from others. Please email us with your comments, feedback and suggestions at: [Email Us](#)
